<b>Description</b>			
<p>When the "create bouquet" option is selected on the network tab, a bouquet is created such as "DVB-T" or "DVB-S". When map to channel is enabled on those bouquets, the services are mapped but they can not be merged between the network bouquets.</p> <p>Since it is possible to receive some of the same channels via satellite and terrestrial, it would be useful to be able to merge.</p>
