Re:- https://tvheadend.org/boards/5/topics/32813?r=34172#message-34172			
<p>I saw that 4.3 had incorporated that patch and thought it would also be in 4.2.x which seems to have taken a while to get updated into osmc (for instance). 4.2.8 came out and I didnt see mention in the changes and dont see it migrated from master into 4.2. Is/was there a reason?.</p> <p>I did a trial build after patching and it seems to work fine however I was trying to avoid causing myself a maintainability nightmare and was waiting for its global acceptance.</p> <p>It makes setting up an hdhomerun much easier.</p> <p>Is there a 4.2.8+ in the works and if so could it include this commit?.</p>

Any chance of getting this in 4.2.next or 4.4 or??, osmc (etc) seem to avoid the odd-numbered releases.

#2 - 2020-01-11 02:27 - Flole Systems

Chances to get this into 4.2 are 0, if it's in 4.3 it will definitely be in 4.4 aswell.
