Target version:		Affected Versions:	
Found in version:	4.3-1795~g771dfd6be		

Description

I noticed that in the web interface section:

configuration > DVB Inputs > Mux Schedulers

I cannot sort the column "Mux": the sort ascending/descending option doesn't seem to work, or at least the sort result does not look like anything I would expect.

If I sort the column "Mux" no effect seems to take place.

If I sort some other column (the sort of other columns works), and then sort the Mux column, the order of the rows changes but does not look like anything I would expect (the rows do not seem to have any meaningful order).
