Category:	Transcoding	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	4.2.7-42~gac839c6		
Description			
<p>I am currently running tvheadend version 4.2.7-42~gac839c6. While using the saved stream profiles i.e webtv-vp8-vorbis-webm or webtv-h264-aac-mpegts, the audio is out of sync with the video i.e. it starts well then ends up slowing down past the video and remains out of sync.</p> <p>Is there a way out of this?</p>
