Description			
Hi tvheadend's,			
i am using 4.3-1804~gebb096804 / Debian Packages. My main goal is to record a couple of news broadcasts every day. To reduce recording place and avoid unnecessary time it could be very helpfull if it possible to reduce the auto-record record time. For instance, the last two or three minutes of all recording are weather brodcasts, hints and tips and stuff like this.			
So, IMHO should we able to set "-2" at the relavated configuration option. This could also prevent oerlap of recordings. I hope thats possible.			
Thanks for this great software piece. Regards, Ralfi
