Description			
Hello everyone,			
Fire TV Stick is one of the most inexpensive 4k TV Stick that supports Netflix and Amazon Prime 4k Content. In the last update Amazon added the Live Tab to the Fire TV Stick (https://www.youtube.com/watch?v=sN2FpxmtVyc&feature=youtu.be)			
Would it be possible to write a Plugin for the Fire TV Stick that integrates TVHeadend into the Live Tab?			
Thank you very much!

I imagine that it will be easier if you ask them for a plugin that supports generic .m3u playlists.

By the way, is that "Live tab" in any way related to the Android TV "live channels"?
