<b>Description</b> <p>I have some autorecs set up using series links and I thought this should prevent duplicates from being recorded. I've got the log for the already recorded episode, the upcoming recording and the xmltv entry for the upcoming recording. Let me know if there is anything else I can provide.</p> <p>Already recorded log <a href="https://pastebin.com/3vRUiQBA">https://pastebin.com/3vRUiQBA</a> Upcoming recording <a href="https://pastebin.com/mcJKrXKY">https://pastebin.com/mcJKrXKY</a> xmltv <a href="https://pastebin.com/25zUM8MA">https://pastebin.com/25zUM8MA</a></p>

This isn't the only time this has happened, but I don't have other examples right now, I've deleted the duplicate recordings.
