

## Tvheadend - Feature #5931

### raspberry pi 4 Encoding

2020-07-24 01:55 - jim okoren

<b>Status:</b>	Rejected	<b>Start date:</b>	2020-07-24
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	John Törnblom	<b>% Done:</b>	0%
<b>Category:</b>	Transcoding	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
Raspberry pi 4 works only with tvheadend configuration->recording->steam profile->pass. Other stream formats send the pi cpu to 400% until reboot. Raspberry pi 4 only has H265 codec, no H264. Can't fast forward recorded "pass" video with blue-ray player or android, unstreamable stream.			

### History

- Status changed from New to Rejected

This is not a feature request.

Also this works as designed. Upgrade to more powerful hardware if you want to use transcoding or try to use hardware based transcoding.

#### #2 - 2020-07-24 23:50 - jim okoren

Pi 2 & 3 worked great for transcoding.

Warn people new Pi 4 H265 incompatible.
