

Tvheadend - Bug #5983

Adding tag to channel hides channel in EPG view

2020-12-07 00:14 - Peter Jodeleit

Status:	New	Start date:	2020-12-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Configuration	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	4.3-1896~gce0907705		
Description			
<p>I reconfigured my TvHeadend installation, and after this no EPG data showed up. Trying different things to nail down a configuration issue after a few hours of investigation (sic!) it boiled down to manual config of channel tags in the web view (tab "Configuration, Channel / EPG, Channels", field "Tags"). Any change there (adding a tag or removing an assigned tag) for a channel lets it disappear from EPG.</p> <p>Deleting the mapped channel and re-adding it again makes the channel reappear in the EPG (without starting an EPG grab).</p> <p>My configuration / setup: SAT-IP DVB-C quad-tuner (FritzBox), internal EPG grab ("EIT: DVB Grabber").</p> <p>I searched for similar issues here but found nothing.</p>

One more thing why setting tags is important to me:

My clients (Kodi, dream Player on android, TvhClnet) show channels / EPG according to tags. Most of the unmodified mapped channels have no tags in my setup so they don't show up in the clients. For the other channels the tags are somehow random so I've got to switch the shown tag in the client configuration which is very inconvenient.
