Target version:		Affected Versions:	
Found in version:	4.3~9ed76c0		
Description			
Hi there,			
I have three versions of this lib on my synology:			
<ol style="list-style-type: none">1. /bin/ffmpeg2. /usr/bin/ffmpeg3. /volume1/@appstore/ffmpeg/bin/ffmpeg			
I must use the last one with tvheadend.			
a which ffmpeg returns			
/volume1/@appstore/ffmpeg/bin/ffmpeg			
but in my playlist pipes, where ffmpeg must use the one from the path, I have /bin/ffmpeg.			
why?

Copy binary elsewhere.

This is not a bug or problem of TVH, this is result of how you use commands in BASH script.
