

Tvheadend - Bug #6081

Stream URL from m3u playlist is changed by import through "IPTV Automatic Network" function and no longer usable.

2021-08-23 22:37 - Michael Rossol

Status:	Invalid	Start date:	2021-08-23
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	IPTV	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	4.3-1975		
Description			
When importing the m3u playlists, the underscore "_" is replaced by an HTML encoding "%5F". Therefore the created muxes do not work. Currently all muxes have to be edited manually.			
The corresponding forum post with examples can be found here: https://tvheadend.org/boards/4/topics/45090?r=45414#message-45414 .

According to rfc2396 it is valid to escape those characters. Further according to rfc2616 URIs should be decoded by the server and the 2 URIs you mentioned in the forum post are equal. Thus, this behavior is explicitly allowed by the rfc and the server is not interpreting this valid request properly, so this bug needs to be fixed serverside.
