Description

Hi everyone,
After some Poerwu changes at 0.8W(probably by the other packages too)the Discovery package not working anymore.It looks like there is no vpid in the stream.
There is already an existing patched oscam and some fix for enigma images (by manually editing the lamedb file).
I tied the same thing : edited /root/.hts/tvheadend/input/dvb/networks/...id/muxes file and manually added the missing pid(you have to build tvheadend with --disable-zlib) option.
The pid appears correctly after reboot,but unfortunately black screen.
Can anyone test tis out or any idea how to patch this "problem"?

Don't loose you time, soon transponder will be off.
Move to 9E with viaaccess 0500:061200
4.8E also have some

#2 - 2021-12-04 14:06 - Anonymous

OK,meanwhile i solved this on my own,it's a shame they gonna switch off
Unfortunately at 9E Viaccess encryption is not working at all with Tvheadend as i know.....)
Thanks for infos anyway..

#3 - 2021-12-05 21:05 - Petar Ivanov

Not working, because not viaaccess card.
If you solved somehow, must be good to say how here.

Here when switch to matroska profile and set Descrambling timeout (ms): 10000 and PowerVU channels with manuel add vpid work, but with pass profile not work.

@Z Csipkes,
Can you share with us the solution in details?
I'm interested.

#5 - 2021-12-12 08:42 - easy easy

Anyone?

#6 - 2021-12-31 21:53 - Alberto Palau

Same here, what was the workaround?
