

Tvheadend - Bug #6183

Tvheadend SAT>IP server doesn't start at boot

2022-07-03 12:41 - Retro Fan

|---|--------------------|---------------------------|------------|
| Status: | Invalid | Start date: | 2022-07-03 |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | SAT>IP | Estimated time: | 0.00 hour |
| Target version: | | Affected Versions: | |
| Found in version: | 4.3.0 Ubuntu 22.04 | | |
| Description | | | |
| <p>I'm using the internal SAT>IP Server from TVH, but it doesn't start at boot even though the settings are correct and the UUID is set (port 554). Configuration is RPI4.</p> <p>I already tried to add 'sleep 15' to /etc/init.d/tvheadend, but no luck. I don't see it as SAT>IP server in other applications. When restarting TVH manually it does work again: sudo service tvheadend restart</p> <p>Is this a bug?</p> <p>And please add the option 'Disable fast input switch' just like other SAT>IP servers. Afaik this is the only setting which is missing for internal SAT>IP server of TVH.</p> <p>Thank you!</p> | | | |

History

#1 - 2022-07-03 13:03 - Fiore Systems

- Status changed from New to Invalid

No debug logs and the version information is either incomplete or super old.

O, sorry, it's the latest Ubuntu 22.04 LTS distro of TVH and I thought it was a general bug. However, with Buster and Bullseye there's no problem. With Ubuntu 22.04 LTS I fixed it with a workaround adding these lines to /etc/rc.local file:

```
sleep 15
sudo service tvheadend restart
```

Topic can be closed ;-)

For ages I have the same problem on Fedora. systemctl restart tvheadend fixes the problem after reboot but I never had the time to look into it. Thought it is related to my unit file or setup. I'm using the current master branch. I can provide more information if needed.

#4 - 2022-08-21 11:55 - Philipp S

I have the same problem with Debian 11 too.

It works on Ubuntu 20.04 with Michael Marley's version.
